

Does the user pushing the start button need to stay in the app? Can they leave and also get a push notification when one of their followers is ready to chat?

User flow on having a caller accept your request to connect.

User flow for those in the queue

- Status**
User can change their availability
- Back**
Navigate back to the previous view
- Menu**
Current view slides aside to reveal the menu
- Interaction**
User action that changes the view

1 ONBOARDING SCREENS: Onboarding designs will be the focus for the design here. 2 ENTER PROFILE: Only mandatory piece a user has to fill out is the username. Save profile button is below the fold. 3 PROFILE CONT.: 4 LOCKED OUT ERROR STATE: 5 FIND FRIENDS: Questions here: - Do we want featured people? - Pull from Facebook? - Twitter? - Instagram? Flipboard does this nicely with tabs so we could look at that tomorrow. 6 HOME SCREEN W/ NOTIFICATIONS: Per Jason's idea we could use the top section to call out important information such as chat requests. 7 HOME SCREEN: Similar to the tumblr onboarding we can introduce the app in this top section. We could have a few top users featured. 8 HOME SCREEN WITH NO REQUESTS: Top section could disappear once user has started following other users and there are no requests. The content would be your feed. 9 NOTIFICATIONS: Tabs help organize the different types of notifications.

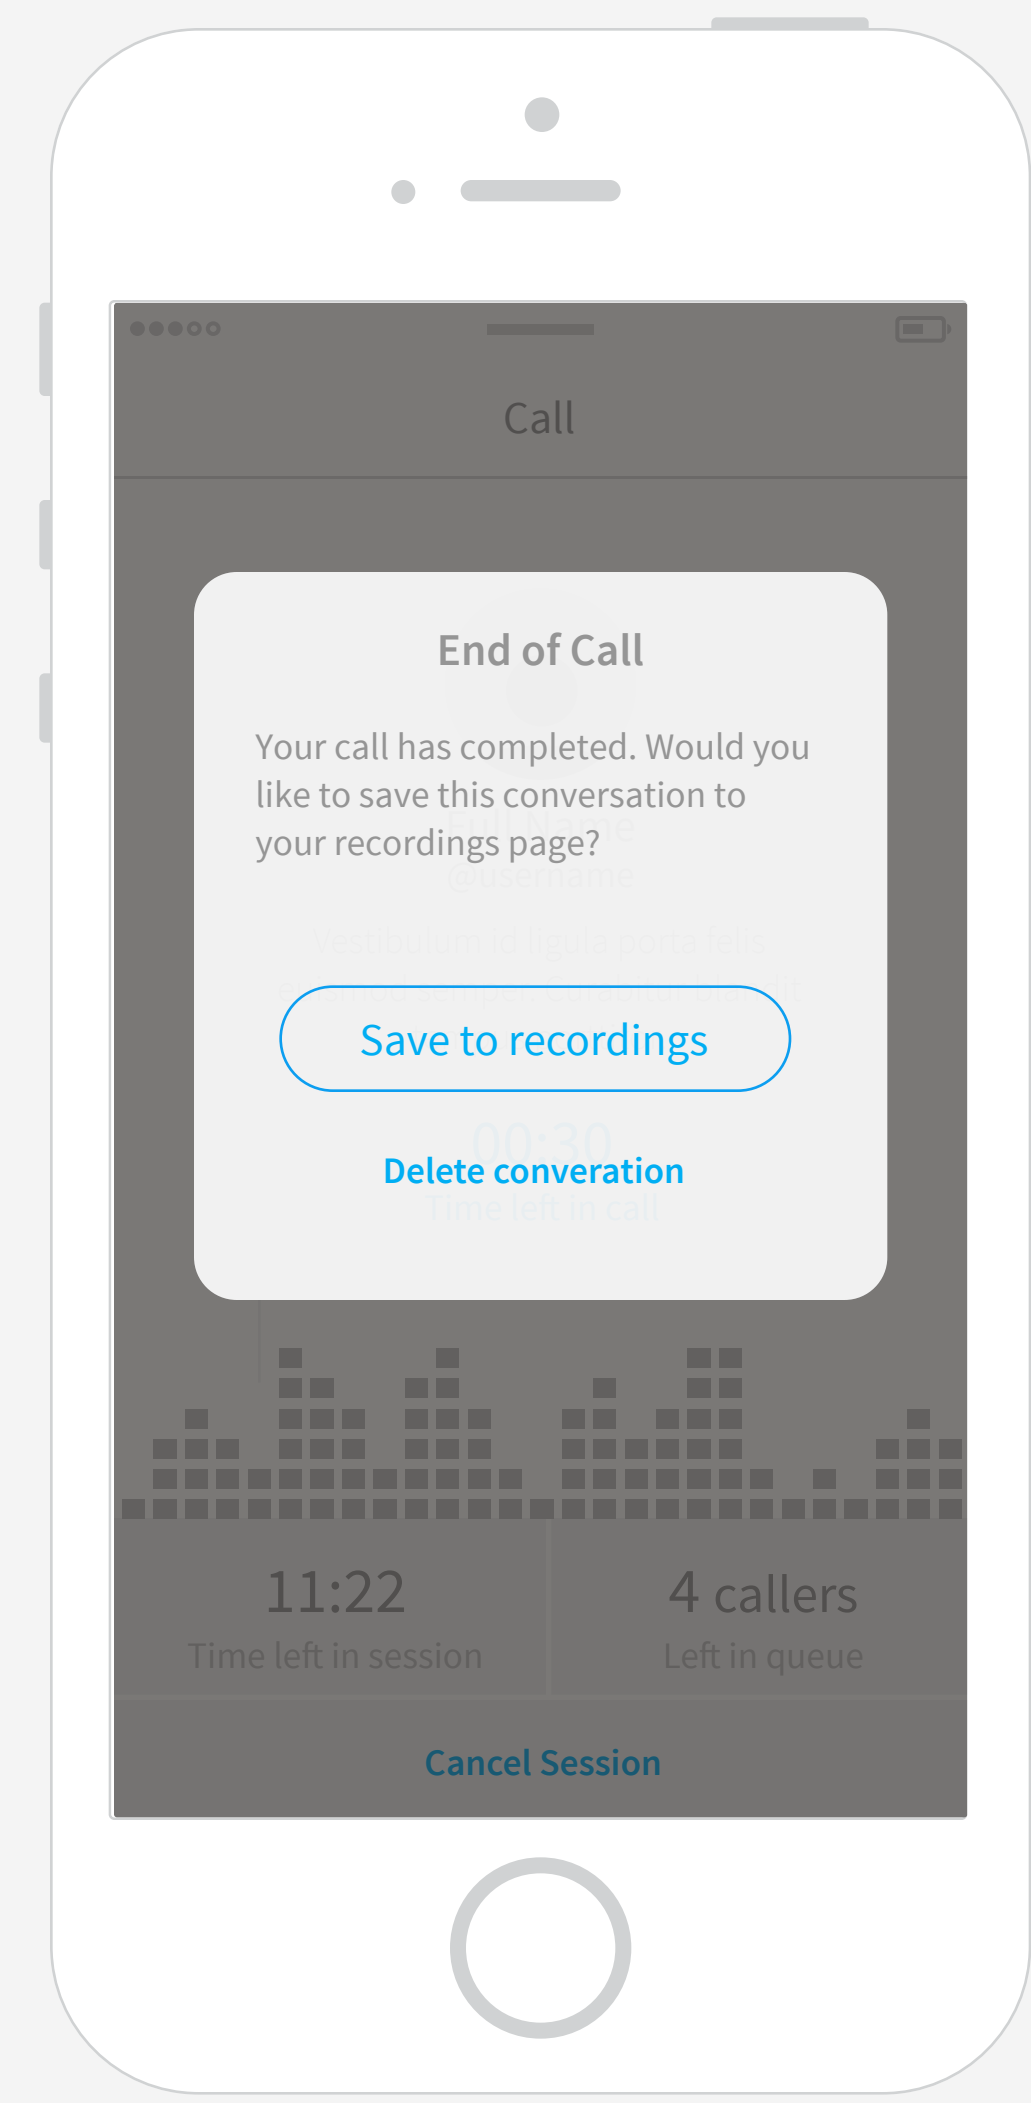

10 SEARCH: Search landing page should be similar to Vine and Instagram and encourage users to explore trending categories and bloggers to start following more people. 11 CATEGORY TOP BLOGGERS: This page would be top bloggers in a certain category. 12 SMART SEARCH: 13 USER PROFILE: The profile for each user would show their photo, name, location and how that timezone relates to viewer and description. It would also have their Published recordings, followers and following as well as options to follow that user or send a chat request. QUESTION: how do we differentiate "Send Chat Request" from just "Following user"? We should talk through language here. 14 SEND CHAT REQUEST: 15 LIMIT REACHED: If we limit users to 5 chat requests, how do we want to message that to the user? Also, does this expire in a certain amount of time? 16 PROFILE/ PERSONAL RECORDINGS: 17 EDIT CALL: 18 PUBLISH CALL:

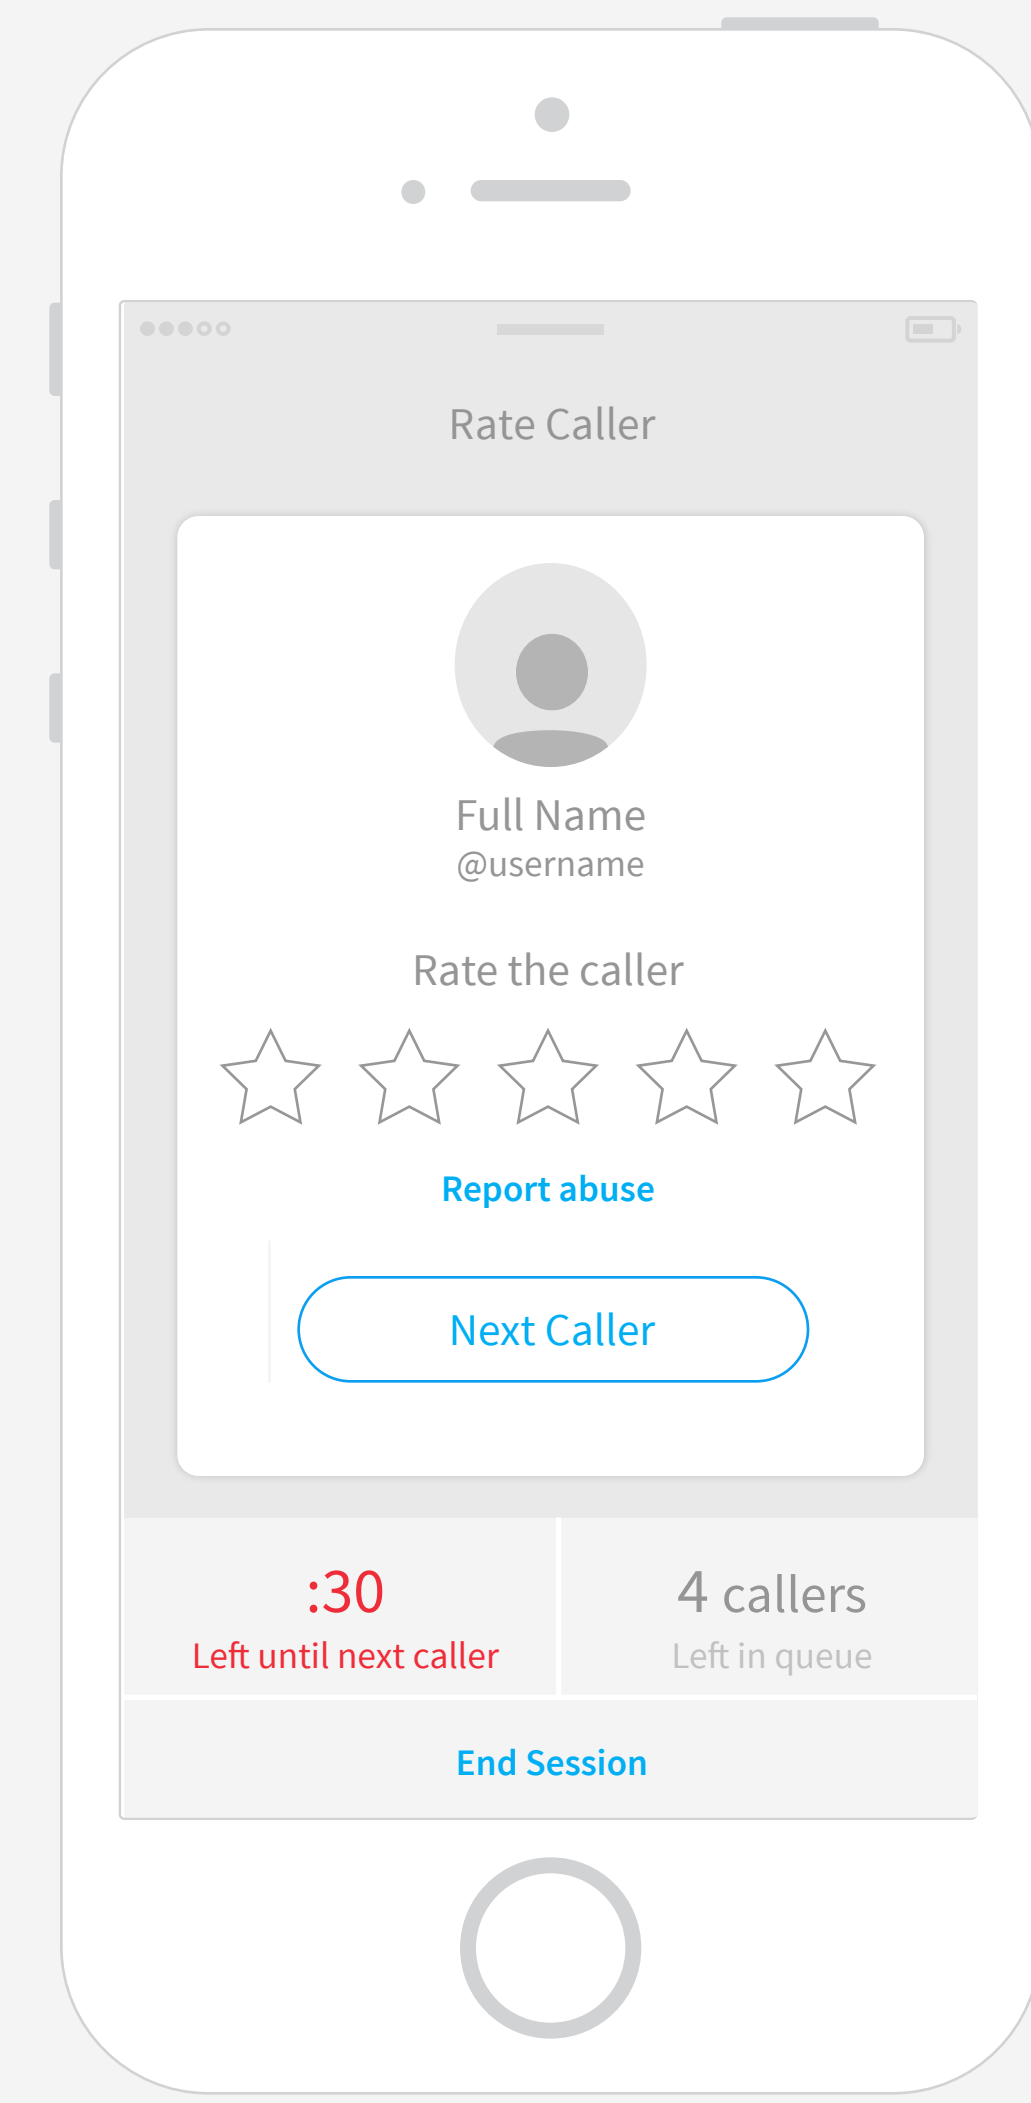

19 RECORDING DETAIL PAGE: Date / time and call details. Callee profile image. 20 REQUESTS: Swipe to delete. May need to educate users on that function. Tap to see their profile. 21 EMPTY REQUESTS PAGE: Visual designs (illustrations) will help these empty states look better. 22 SET CALL SESSION TIME: User picks how long they want their session. What time increments should we have here? 23 ACCEPT CALLER AND START CALL: View of the first caller in queue. You would see the time left in overall session and how many others are in the queue below. 24 NO CALLERS IN QUEUE: We should let the user know they can leave and the app would notify once someone joins the session. 25 CALL: Time left in call is prominent. 26 CALL WITH 30 SECONDS LEFT: At 30 seconds left the time becomes highlighted to indicate the time is almost up. User can click to add additional time. Should we even allow for a call to start if there isn't enough time in the session left? 27 SESSION WITH 30 SECONDS LEFT: At 30 seconds left the time becomes highlighted to indicate the time is almost up. User can click to add additional time. Should we even allow for a call to start if there isn't enough time in the session left?

30

END OF SESSION

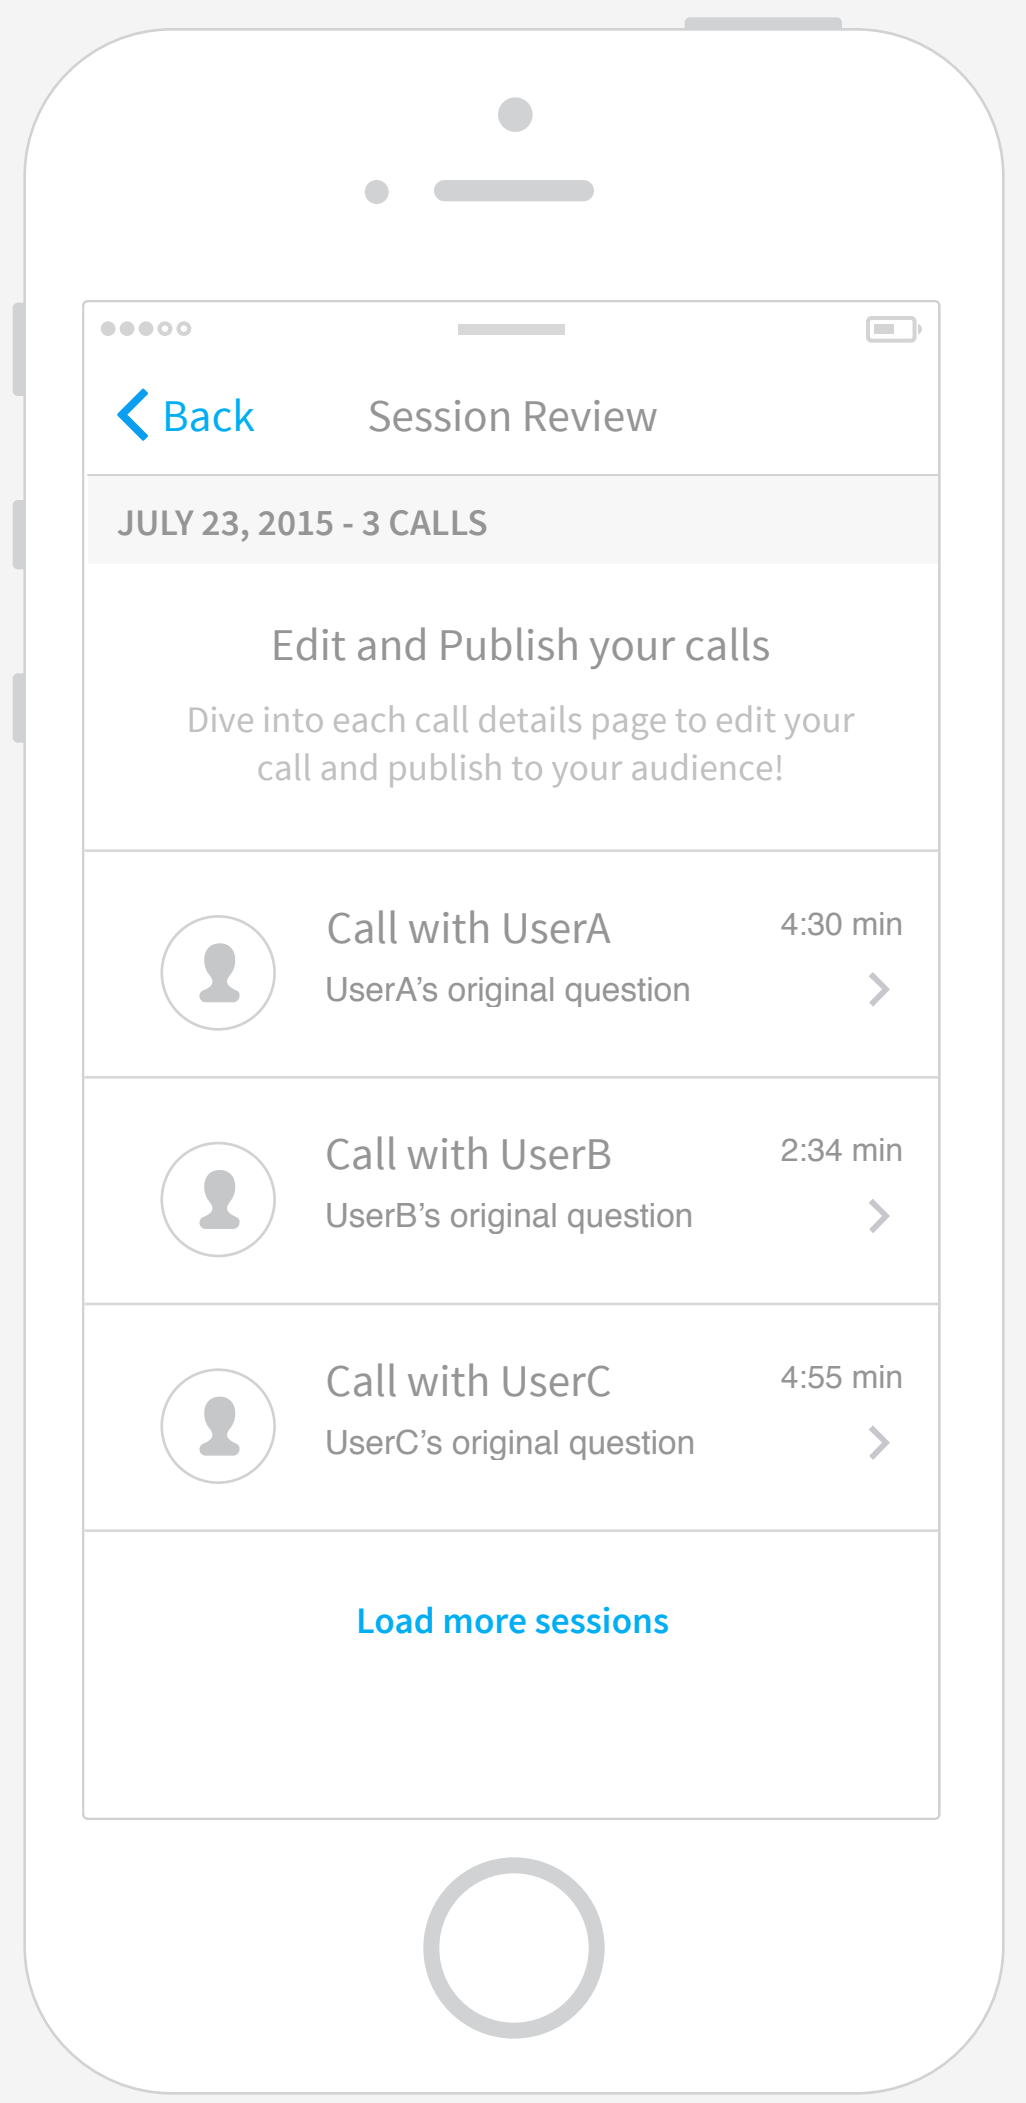

Options to add time or go back to home. If users still in the queue then we could let them know in the copy.
QUESTION- In b/w callee adding more time to their session how do we communicate that to caller. EX: call ends, caller gets notified session ended, caller gets notified session then has time added?

39

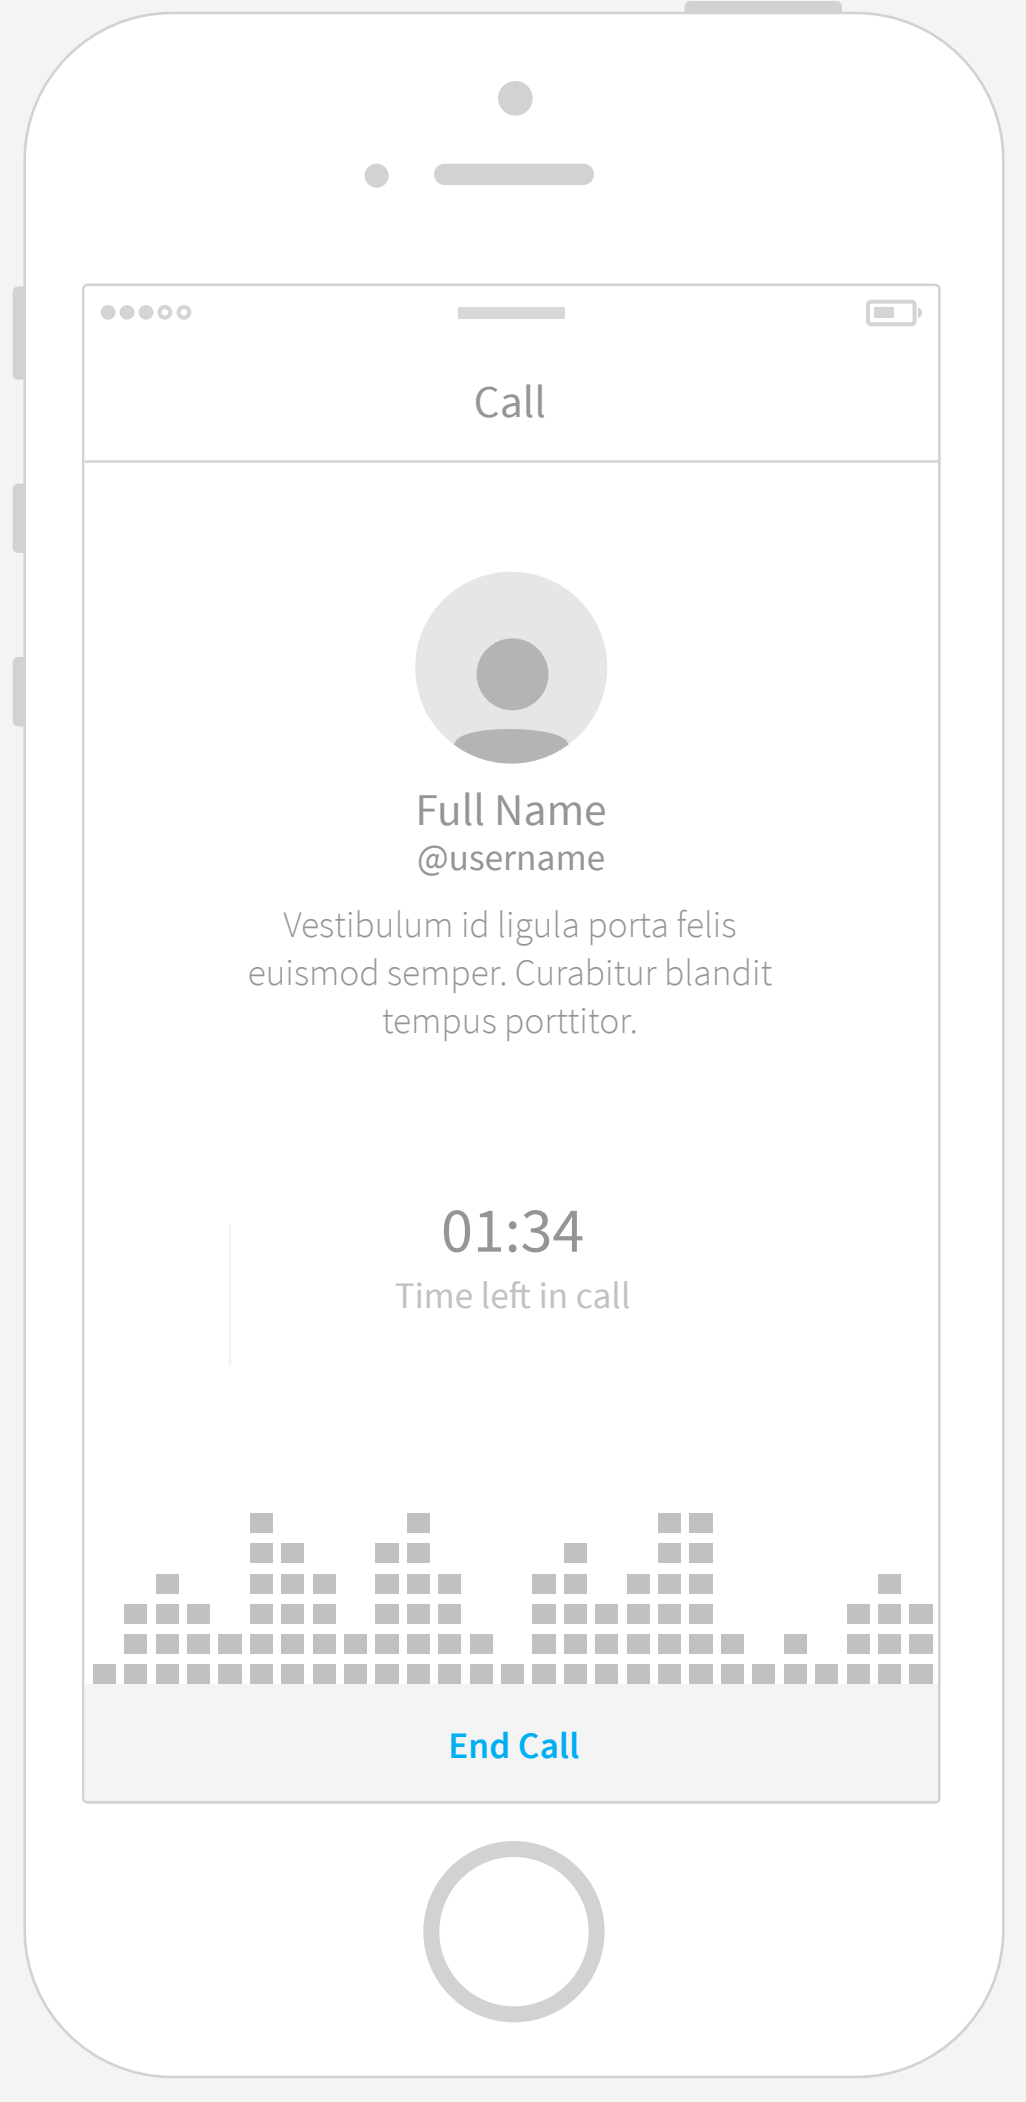

IN QUEUE
Based on if they aren't the first to respond the user would be placed in a queue. We could let them leave the app and then send a push notification when they are 30 seconds to being next in line.

40

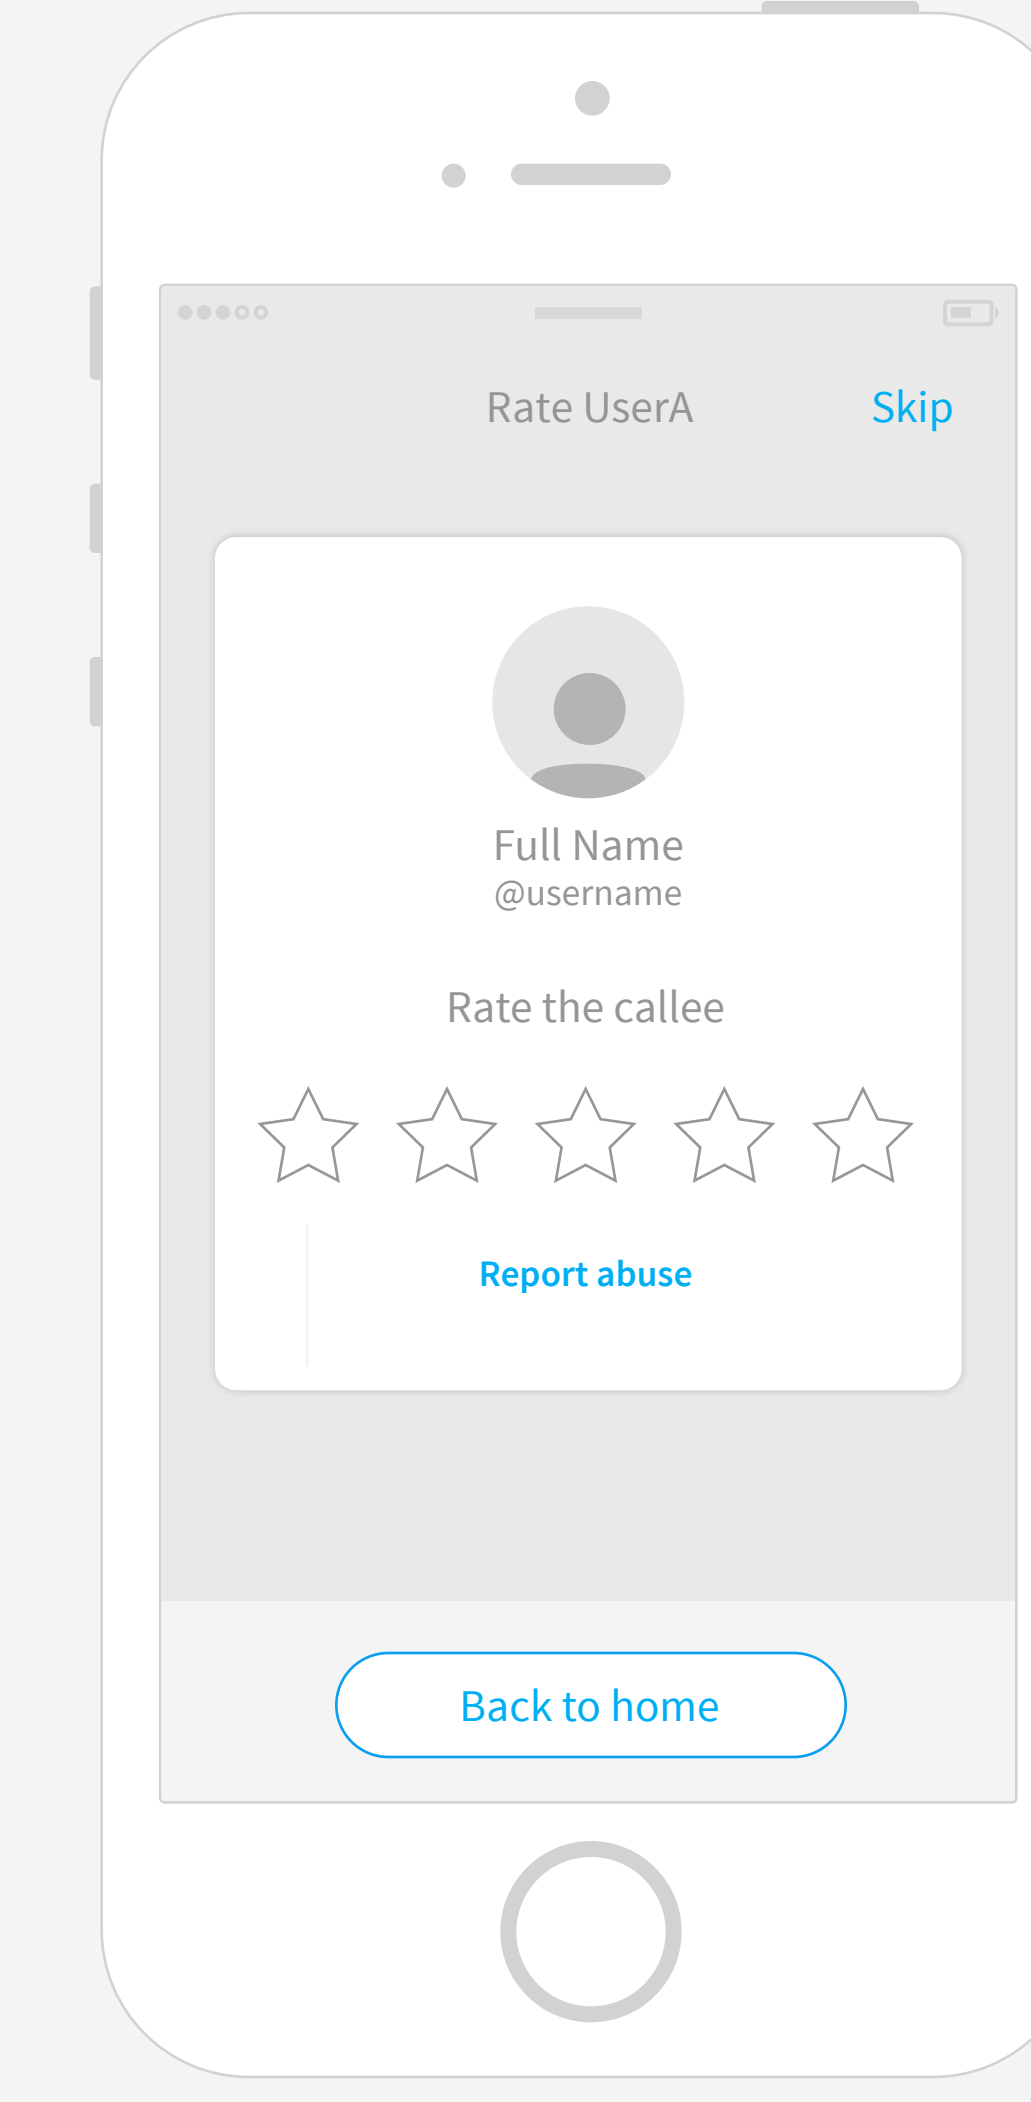

CONNECTING
I would love to think of a clever animation to connect the call.

42

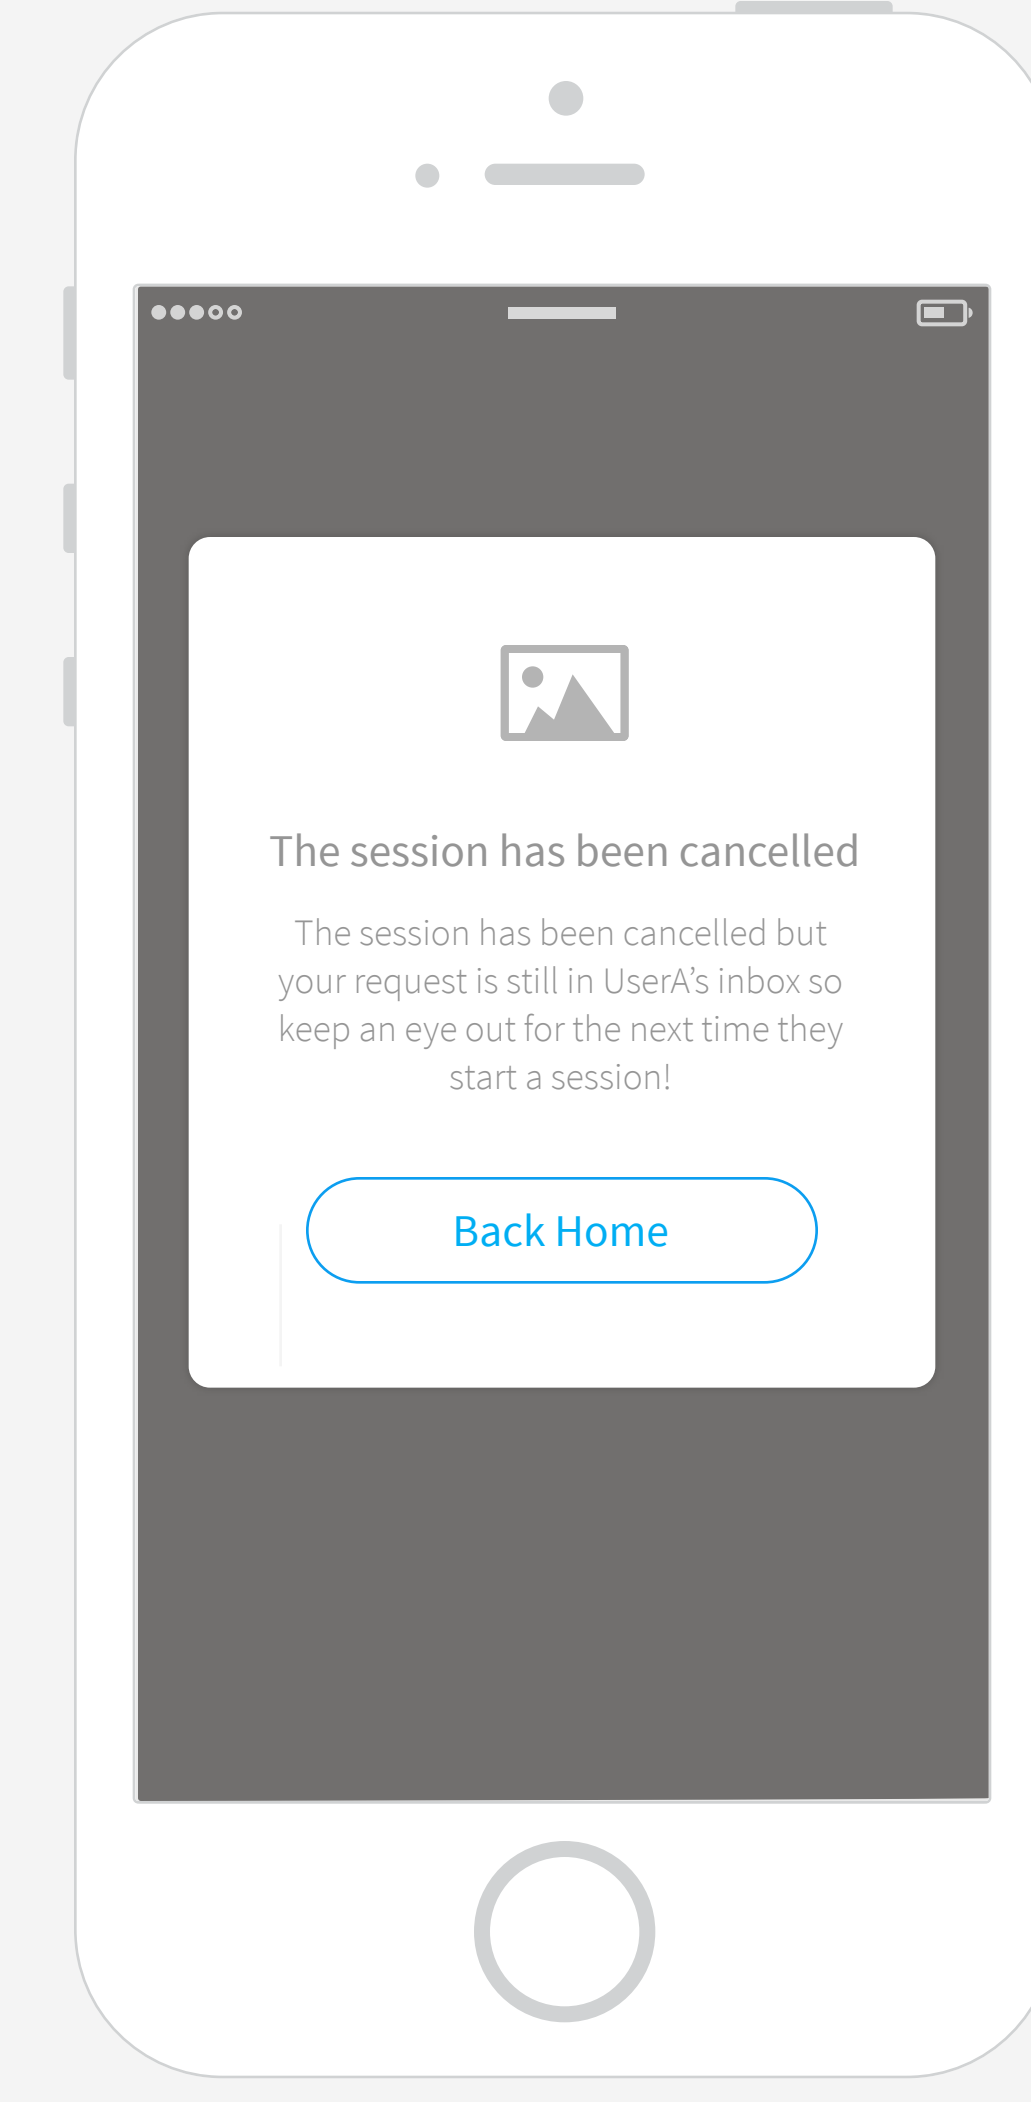

REVIEW CALLEE
Do we want the caller to be able to describe the call or just the callee? Here they can rate, report abuse, share or go back home.
